

# Upgrade to QuickBooks Online (Recommended)

## DETERMINE WHAT VERSION OF QUICKBOOKS DESKTOP YOU ARE USING

- The *Title Bar* should display your **company name** and the working **QuickBooks desktop version**.

## REASONS TO UPGRADE TO QUICKBOOKS ONLINE:

- QuickBooks desktop only supports versions for 2 ½ years before they sunset that desktop version (discontinue support). If you wish to continue to use the desktop version of QuickBooks (not recommended), we ask that you upgrade at least every two years. If we do your monthly bookkeeping, we require you to upgrade every year.
- QuickBooks Desktop 2016 will be retiring in early 2019.
- QuickBooks Online is easy access, virtual, current and allows both you, your team and Lewis & Knopf to view active live accounting data, which enables us to offer to you more timely advanced services. It allows you to remain current and up to date with your accounting, so you can quickly make timely decisions on the direction of your business.

If you would like Lewis and Knopf to assist you with your conversion of desktop to QuickBooks Online, *please contact our Small Business Services at 810-238-4617*. We have a large team of Certified Pro Advisors ready to assist you. Due to our large presence with QuickBooks, we receive additional discounts on QuickBooks software that we pass along to our clients and we can make the conversion process as seamless and pain-free as possible for you!

## QuickBooks Data Reviewed (Optional)

Lewis & Knopf, CPAs would like to help you “GROW” your business! A great step toward growing your business is to know where you are versus where you want to be. You should be able to get a clear picture by printing a Balance Sheet and Profit & Loss from your QuickBooks file. From that data, you can improve your ability to make important business decisions and Lewis & Knopf CPAs can help!

### ACCOUNTING ADJUSTMENTS TO CLEAN-UP YOUR QUICKBOOKS

Can you review and understand the *Balance Sheet* and *Profit & Loss* and know what makes up each account *and* feel comfortable that each total is correct?

For Example:

- Can you look at your bank balance and be confident it is a true book balance?
- Can you run an A/R Summary and confirm each customer’s balance is accurate?
- Can you run an A/P Summary and confirm each vendor’s balance is accurate?
- Is your Retained Earnings the same number as of December 31 of the prior year?

The possibilities for accounting errors are endless and using inaccurate information to make decisions can be dangerous. If you have any doubts about your account balances, Lewis & Knopf can help you:

1. Identify what should be in each account.
2. Reclassify transactions so each account reflects the correct amount.
3. Better understand reports in QuickBooks.

By allowing Lewis & Knopf, CPAs to help you identify errors in your QuickBooks data and show you how to fix them before year-end you can save yourself:

1. **Money** – Lewis & Knopf, CPAs will not have added time cleaning up your QBs each year to determine your correct balances that will be reported to the Government.
2. **Time** – The sooner you identify and fix your errors, the fewer errors you will have to fix.
3. **Aggravation** – The management reports you rely on will not contain errors.

### YEAR-END TAX PLANNING

The Partner in charge of your account would like to help you:

1. Understand your financial position.
2. Determine where you want your business to go.
3. Advise you on the savings and consequences of management decisions to make.

By meeting with you before the year-end, they can assess:

1. Where you are today.
2. Where you will be at the end of the business year.

In this manner, they can help you determine what actions need to be taken before the year-end. By scheduling a year-end tax-planning meeting, you can gain a better understanding of the current financial picture for your business.
